

DBMaker/DBMaster FAQ Document

Question:

How to avoid the use of high-frequency characters 3?

Answer:

First, user should backup the file tw.tab which located in c:\dbmaker\4.3\shared\stopword\ tw.tab, then open tw.tab and delete following contents.

0

1

2

3

4

5

6

7

8

9

10

After that, rename tw.tab to stopwords.tab.(xx.tab user can named it by themselves)

Second, set DB_STPWD= stopwords.tab in dmconfig.ini, then restart database.

At last, delete the original text index and recreated it can exclude high-frequency characters 3.
