

# DBMaker/DBMaster FAQ Document

## Question:

How to start the database in single-user mode for maintenance? (DBMR2947)

## Answer:

You can use dmSQL or JDBC tool to maintain database in single-user mode. Follow below step to start the database for maintenance. Take database DBSAMPLE5 for example.

### 1. Using dmSQL tool

- a. Terminate the database.
- b. Run dmSQL tool.
- c. Start the database DBSAMPLE5.

```
dmSQL> start db DBSAMPLE5 sysadm;
```

- d. Maintain the database.
- e. Terminate the database.

```
dmSQL> terminate db;
```

### 2. Using JDBC tool in Windows

- a. Terminate the database.
- b. Open dmconfig.ini, comment DB\_SVADR and DB\_PTNUM, and save it.
- c. Open JDBC tool, and connect the database DBSAMPLE5.
- d. Maintain the database.
