

DBMaker/DBMaster FAQ Document

Question:

How to send mail to DBA immediately when DMERROR.LOG is updated?
(DBMR2257)

Answer:

Once DMERROR.LOG is updated, DBMaker will immediately send DBA an email of which the content is "Please see the alter message in C:\DBMaker5.2\DMERROR.LOG". ("C:\DBMaker5.2\DMERROR.LOG" will be replaced with the actual path of DMERROR.LOG for different users) The one thing users need to do is setting DB_ERMRv and EB_ERMSv in dmconfig.ini.

For example:

```
DB_ERMSV = LAMBS.ad.syscom.com.tw           ;SMTP server address
DB_ERMRV = Snow_Wang@email.lingan.com.cn ;DBA's email aaddresses
```

Version: DBMaker4.x/5.x

Product: Normal/Bundle

Platform: Windows/Linux
