DBMaker/DBMaster FAQ Document

Question:

What's the path of the file DMDUMPxxxx_x.DMP? (DBMR2508)

Answer:

DMDUMPxxxx_x.DMP is usually located under the database directory which will be recorded into DMERROR.LOG. However, if a user uses the database of which version is Bundle and is published before November 12, 2013, DMDUMPxxxx_x.DMP may be located under the directory C:\ when the database crashes.

Version: DBMaker 5.2.x

Product: Bundle

Platform: Windows/Linux
