

DBMaker/DBMaster FAQ Document

Question:

With MF Visual Studio, how to use the WHERE condition in DCI both for main program and sub program (DBMR2608)

Answer:

Fill in "nofcd3 createxfd callfh "DBMAKERINTF.dll"" in the "Additional directives" field in the property page of the program, and put DBMAKERINTF.dll in the folder where the files locate created after the program being compiled,

Version: All

Product: Normal
