

DBMaker/DBMaster FAQ Document

Question:

How to rebuild DATABASE by shell script? Could you give me some sample scripts for it?

Answer:

Please refer the \${dbmaker_home}\samples\DATABASE\init.sql.

```
CREATE DB DBSAMPLE4;
```

```
CREATE TABLE SYSADM.Card ( NumSERIAL(1) PRIMARY KEY,FirstName  
VARCHAR(30), LastName VARCHAR(30),TitleVARCHAR(30), Bmp LONG VARBINARY)  
IN DEFTABLESPACE;
```

```
INSERT INTO SYSADM.Card VALUES (?, ?, ?, ?, ?) ;
```

```
1, 'Eddie', 'Chang', 'Manager', &data1.b0(0,6666);
```

```
2, 'Hook', 'Hu', 'Software Engineer', &data1.b0(6666,6666);
```

```
3, 'Jackie', 'Yu', 'Software Engineer', &data1.b0(13332,6666);
```

```
4, 'Ray', 'Sung', 'Software Engineer', &data1.b0(19998,6666);
```

```
5, 'Louis', 'Liu', 'Software Engineer', &data1.b0(26664,6666);
```

```
6, 'Trent', 'Clowater', 'Software Engineer', &data1.b0(33330,6666);
```

```
7, 'Oscar', 'Tseng', 'Software Engineer', &data1.b0(39996,6666);
```

```
8, 'Jerry', 'Liu', 'Manager', &data1.b0(46662,6666);
```

```
END;
```
