

DBMaker/DBMaster FAQ Document

Question:

Are the User ID and Password encrypted when connecting to database via network? Or they only be encrypted when setting DB_NetEc=1? Is any possibility of leakage UID and Password in network with setting DB_NetEc=0?

Answer:

Yes. UID and Password are encrypted in the networking flow no matter whether set keyword DB_NetEc. Even if setting DB_NetEc=0, it is impossibility of leakage UID and Password in network.
