

# DBMaker/DBMaster FAQ Document

## Question:

What ADO functions does DBMaker support? (From DBMR1726)

## Answer:

There are three layers in ADO model, according to each model, the situation of the DBMaker supports are:

1. DBMaker supports Microsoft Activex Data Objects Library, but DBMaker does not support server side cursor in OLEDB Driver.
2. DBMaker does not support Microsoft Activex Data Objects (Multi-Dimensional) Library.
3. DBMaker does not fully support Microsoft ADO Extension for DDL and security.
