

# DBMaker/DBMaster FAQ Document

## Question:

How to successfully create stored procedure from 03mail.ec which is installed with DBMaker samples in the StoreProc folder? (Version; DBMaker 4.3)

## Answer:

For using **03mail.ec** correctly, user needs to link wsock32.lib:

First, Modify templates\vc60.mak as follows:

LINK32\_FLAGS=**wsock32.lib** C:\DBMaker\4.3\lib\dmudf.lib

Then, create procedure from 'C:\dbmaker\4.3\samples\StoreProc\03mail.ec';

It will be ok.
