

DBMaker/DBMaster FAQ Document

Question:

如何将16进制转换成字符或者整形数据 (DBMR2801)

Answer:

你可以使用CAST函数将hex转换为char,用BINTOINT 函数将hex转换为integer数据类型.此外，从2016/02/23之后提供的版本开始支持BINTOINT函数.

例子:

```
dmSQL> select cast('6162'x as char(2));

CAST('6162'X AS CHAR(2))

=====

ab

dmSQL> select cast('ab' as binary(2));

CAST('AB' AS BINARY(2))

=====

6162

dmSQL>CREATE FUNCTION strtoint.BINTOINT(BINARY(8)) RETURNS BIGINT;

dmSQL>select bintoint('07DF'x);

BINTOINT('07DF'X)

=====

2015
```

版本: 5.3.3, 5.4.1
