

DBMaker/DBMaster FAQ Document

Question:

How to convert hex type data to char or integer type data (DBMR2801)

Answer:

You can use CAST to convert hex to char, and use BINTOINT to convert hex to integer type. Function BINTOINT supported in new versions built after 2016/02/23.

Usage examples:

```
dmSQL> select cast('6162'x as char(2));

CAST('6162'X AS CHAR(2))

=====

ab

dmSQL> select cast('ab' as binary(2));

CAST('AB' AS BINARY(2))

=====

6162

dmSQL>CREATE FUNCTION strtoint.BINTOINT(BINARY(8)) RETURNS BIGINT;

dmSQL>select bintoint('07DF'x);

BINTOINT('07DF'X)

=====

2015
```

Version: 5.3.3, 5.4.1
