

DBMaker/DBMaster FAQ Document

Question:

Does DBMaker bundle have limitation on the database size when use zip backup function? (DBMR1968; Version: DBMaker 4.3.4 bundle)

Answer:

About zip backup, DBMaker does not have limitation on the database size. But we only have tested for 100G database for the disk space reason.

Please note if OS has problem or limitation, applications which are running on the OS will also have the issue.
