

DBMaker/DBMaster FAQ Document

Question:

How to get the DEADLOCK error message (DBMR: 2081)?

Answer:

In order to get more useful information for DEADLOCK we can set some keywords in dmconfig.ini file to trace. Detailed setting for NEW log system for DEADLOCK investigation will be list as follows:

You can set follow keywords in dmconfig.ini

```
DB_LGDIR=<you log path>
```

```
DB_LGLCK=1
```

```
DB_LGSVR=3 ;( 1.....6)
```

If you want to get more information you can set keyword DB_LGSVR greater than 3 .Finally, you can check the error message about deadlock in directory which specified by DB_LGDIR When dead lock occur.

Version: DBMaker4 series / 5 series

Product: Normal/ bundle
